EXPERIENCE

IDS AirNav – ENAV Group

DevSecOps Engineer

Apr 2021 – Ongoing Rome, ITA

- Appointed Security Champion, involved in DevSecOps & automation to streamline Non-functional requirements.
- Developed a web-based migration tool in Python as part of the team maintaining the new IAM solution. Worked on several performance enhancements for the product suite.

Java | Spring Boot | Kafka | python | Django | JS | bash | Docker | Jenkins | Ansible | OWASP | CIS | Keycloak

Temple University – Rome Campus

Adjunct Instructor

Jan 2018 – Ongoing Rome, ITA

- Teaching several classes, including Problem Solving & Python.

Teaching | Planning | Public speaking | English

Cybertech.eu – Engineering

System Analyst Intern

Apr 2021 – Apr 2021 Rome, ITA

Accenture Technology

Software Developer Intern

Dec 2020 – Mar 2021 Rome, ITA

Sapienza University

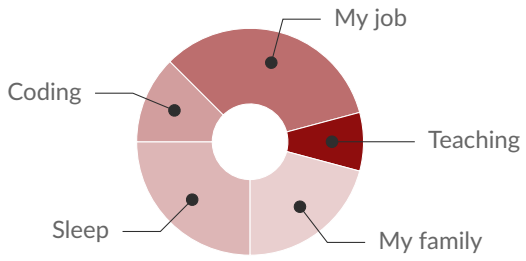
PhD Researcher & Teaching Assistant

Sep 2017 – Jan 2021 Rome, ITA

- Conducting my research project, working with a few students each year, that contributed to my own project.
- TAing many classes, besides Aerodynamics Labs.

Research | Team Leading | Mentoring | Git | Agile

A DAY OF MY LIFE



PROJECTS

Temple University - Rome Campus

walkintiber - 3D Digital Twin of Rome

Aug 2024 – Present Rome, ITA

- Co-founded an immersive 3D model of Rome, allowing users to explore the city virtually via a web interface.
- Built a pipeline integrating live data from OpenStreetMap (OSM) to continuously update and enhance the model with realistic textures and digital elevation, supported by generative AI.
- Engaged TUR students and faculty in "walks in Rome" for hands-on learning in data mapping and VR technologies.

EDUCATION

Sapienza University – DIMA

Ph.D. in Theoretical & Applied Mechanics

Nov 2017 – May 2021 Rome, ITA

"Droplet condensation in turbulent jets."

HPC | MPI | C | Multiphase Flows

Sapienza University – DIMA

M.Sc. in Aeronautical Engineering

Sept 2014 – July 2017 Rome, ITA

"A consistent framework for mass, momentum and energy exchange in two phase flows: DNS of a turbulent jet in the two-way coupling regime."

110/110 cum laude

Fortran | PDE | Navier-Stokes Eqs.

ISAE Supaero – DAEP

Erasmus+ Program

Jan 2016 – Aug 2016 Toulouse, FRA

"Cost versus accuracy in LES of wall bounded flows in CharlesX."

python | C++ | bash | French

LANGUAGES

English (Full Professional)
French
Italian (Native)
